

Soil Erosion

Sheet and Rill Erosion

Planning Criteria	Planning Criteria Met	
Screening level: Permanent ground cover $> 90\%$ and slope $< 10\%$. Assessment level: The water erosion rate is $<=$ T.	Yes	No
Evaluation Tests	Evaluation 7	Test Met
All temporary or permanent rills and gullies are stabilized. All areas expected to have high erosion rates are stable.	Yes	No 🗌
All non-traffic areas are vegetated.	Yes	No
Wind Erosion		
Planning Criteria	Planning Cr	riteria Met
Screening level: Permanent ground cover $> 90\%$ and slope $< 10\%$. Assessment level: The wind erosion rate is $<=$ T.	Yes	No
Evaluation Tests	Evaluation Test Met	
All non-traffic areas are vegetated.	Yes	No
All temporary or permanent rills and gullies are stabilized. All areas expected to have high erosion rates are stable.	Yes	No

Classic Gully Erosion

Planning Criteria	Planning Ci	riteria Met	
Screening level: Classic gullies are not present. Assessment level: Classic gully management is adequate to stop the progression of head cutting and widening and are offsite impacts are minimized by vegetation and/or structures.	Yes	No	
Evaluation Tests	Evaluation	Test Met	
Soil erosion in areas integrated with trees is controlled. There are no impacts on sensitive vegetation. There are no occurrences or enlargement of gullies.	Yes	No	
All temporary or permanent rills and gullies are stabilized. All areas expected to have high erosion rates are stable.	Yes	No	
Water runoff from hard surfaces, such as building roofs, is controlled to the point that is does not cause erosion or large streams of water	Yes	No 🗌	

Excess Water

Runoff and Flooding and Ponding

Planning Criteria	Planning Criteria Met
Screening level: Ponding or flooding not a problem AND activities do not cause ponding/flooding problems. Assessment level: Excess water is managed to meet client's objectives.	Yes No
Evaluation Tests	Evaluation Test Met
Water runoff from hard surfaces, such as building roofs, is controlled to the point that it does not cause flooding or ponding	Yes No

Water Quality Degradation

Excessive Sediment in Surface Water

Planning Criteria	Planning Criteria Met
Screening level: Permanent ground cover $>$ 90% and slope $<$ 10% AND classic gullies are not present AND streams or shoreline are not on or adjacent to site. Assessment level: Upslope treatment and buffer practices address concentrated flows to water bodies AND the SVAP2 - bank condition $>=$ 5 AND the livestock and vehicle water crossings are stable AND The water erosion rate is $<=$ T AND wind erosion rate is $<=$ T.	Yes No
Evaluation Tests	Evaluation Test Met
All small, temporary or permanent rills and gullies are stabilized.	Yes No No

Air Quality Impacts

Emissions of Particulate Matter (PM) and PM Precursors

Planning Criteria	Planning Criteria Met	
Screening level: Activities are not present that contribute to agricultural source PM or PM precursor emissions AND episodes or complaints of emissions of PM (dust, smoke, exhaust, etc.), or chemical drift have not occurred. PM producing activity examples are: Prescribed Burn is conducted, Travel ways unpaved or untreated with binding agents, Engines (combustion source), Tillage, Pesticides are applied, Fertilization (manure/ commercial), CAFO/manure management). Assessment level: PM and PM Precursor emmissions are managed to meet client objectives.	Yes	No
Evaluation Tests	Evaluation	Test Met
Dust is controlled on all non-vegetated, unpaved travel ways.	Yes	No 🗌

Inefficient Energy Use

Equipment and Facilities

Planning Criteria	Planning Cr	iteria Met
Screening level: Client is not interested in improving equipment and facilities energy efficiency. Assessment level: Major components of a USDA approved energy audit have been implemented that address equipment and facilities to meet client objectives OR On-farm renewable energy and/or energy conserving practices have been implemented to meet client objectives.	Yes	No
Evaluation Tests	Evaluation Test Met	
Renewable energy systems are applied. For example, solar, wind, geothermal, or hydro.	Yes	No 🗌
Energy loss from lighting, drying, refrigeration, cooling, heating, or building insulation has been improved.	Yes	No 🗌
Farming/Ranching Practices and Field Operations		
Planning Criteria	Planning Cr	iteria Met
Screening level: Client is not interested in improving equipment and facilities energy efficiency. Assessment level: Major components of a USDA approved energy audit have been implemented that address equipment and facilities to meet client objectives OR On-farm renewable energy and/or energy conserving practices have been implemented to meet client objectives.	Yes	No
